The listed measures represent extrapolated average values that may be slightly different on the product ( $\pm 2\% \pm 5$  cm).

Height dimensions are based on ground socket BT. These vary slightly depending on the type of base. Except for steel base minus 5 cm.

The max. wind speed limits as per our separate list apply only in the presence of a fix ground anchorage. A base with the specified minimum weight is not sufficient.

In the presence of several parasols, the minimum distance between one parasol and another and between parasols and walls shall be 20 cm.

Loose cover max. 10 cm, concrete thickness  
min. 30 cm (pay attention to frost depth),  
Guarantee water drainage
